

ITAB

-
- The image displays two circular LED ceiling lights against a plain white background. The top light features a black outer ring and a white, textured, dome-shaped lens. The bottom light has a white outer ring and a similar white, textured, dome-shaped lens. Both lights are shown from a top-down perspective, highlighting their circular design and the texture of the lens.

The diagram shows a mechanical linkage system. A horizontal base of length A supports a vertical column of height B . A curved arm is pivoted at the top of the column. The arm has a length C and is shown in two positions: a solid line and a dashed line. The pivot points are labeled 'a' and 'b'. The base is labeled 'A' and the column is labeled 'B'.
